PROFESSIONAL SUMMARY

HVAC Technical Office & Estimation Engineer with 5 years in HVAC air-distribution manufacturing. Prepares BOMs, cost estimates, quotations, technical submittals, and prequalification documents, and has supported more than 200 technical proposals across Egypt and the GCC in line with SMACNA, ASHRAE 70, AHRI 885, AMCA 500, and UL 555/555S. Uses PMP® and Lean Six Sigma methods, Power BI, an internal ERP, and an AI-assisted BOQ workflow to make estimation more structured and consistent.

CERTIFICATIONS

- **Project Management Professional (PMP®)** — Project Management Institute (PMI) · Credential No. 4252282 · Dec 2025 – Dec 2028
- **Certified Lean Six Sigma Black Belt** — IMC, CPD-accredited (72 CPD hours) · Certificate C-2026-061167 · Sep 2026

CORE SKILLS

- **HVAC Estimation & Technical Office:** Tendering, BOQ review, BOM preparation, cost estimation, technical quotations, technical submittals, prequalification, compliance documentation
- **Product Selection:** Air outlets, grilles, VCDs, fire & smoke dampers, VAV boxes, louvers, ductwork, sound attenuators; acoustic path analysis
- **Standards:** SMACNA, ASHRAE 70, AHRI, AHRI 885, AMCA 500, UL 555, UL 555S
- **Estimation Tools:** Advanced Excel, internal ERP (costing, BOM, quotations), AI-assisted document processing, Power BI, AutoCAD, Revit, SolidWorks, Microsoft 365
- **Project & Process:** Project management (PMP®), Lean Six Sigma, root cause analysis, Pareto analysis, workflow design, Microsoft Project

PROFESSIONAL EXPERIENCE

Senior Technical Office & Estimation Engineer

AL SAMMAN for Air Distribution — Ductwork & Accessories Factory, Egypt | Apr 2026 – Present

- Prepare bills of materials (BOM) and cost estimates for HVAC air-distribution products as part of tendering and quotations.
- Coordinate technical submittals, prequalification packages, and compliance documentation for HVAC projects.
- Built an AI-assisted BOQ-to-quotation workflow that reads Excel, PDF, Word, and scanned BOQs in Arabic and English, turning manual quotation preparation into a more consistent, semi-automated process.
- Designed and developed an internal ERP system covering costing, BOM, quotations, inventory, and operational data; used locally for daily estimation and operations work.

CSD Operations Team Leader

Rabie Al-Takyeef Factory — HVAC Manufacturing, Egypt · Customer Service Department (CSD) | Aug 2024 – Feb 2026

- Led an 18-member cross-functional team of engineers and data specialists responsible for service requests, work orders, quotations, and operational follow-up.
- Built and deployed 6 Power BI dashboards (service requests, work orders, quotations, workload, employee performance, management reporting), replacing approximately 8 hours per week of manual Excel reporting.
- Redesigned service-request and work-order workflows using value stream mapping, Pareto analysis, and root cause analysis.
- Resolved more than 20 critical technical issues through cross-functional coordination and structured problem solving.
- Acted as escalation point for operational and project risks; mitigated 3 major schedule overruns through early intervention and resource reallocation.
- Recruited and onboarded 10 new team members; designed a 7-module HVAC training curriculum and mentored more than 15 junior engineers and data specialists.

Technical Support Engineer

Rabie Al-Takyeef Factory — HVAC Manufacturing, Egypt | Dec 2021 – Jul 2024

- Prepared technical offers, quotations, submittals, and prequalification documents for more than 200 proposals across Egypt and the GCC.

- Supported product selection for air outlets, grilles, volume control dampers (VCDs), fire and smoke dampers, VAV boxes, louvers, ductwork, and sound attenuators.
- Performed acoustic path analysis per AHRI 885 and selected sound attenuators to meet project noise criteria.
- Aligned technical documentation with SMACNA, ASHRAE 70, AHRI, AMCA 500, UL 555, and UL 555S requirements.

SELECTED PROJECTS

- **AI-Assisted BOQ-to-Quotation Workflow** — Reads Excel, PDF, Word, and scanned BOQs in Arabic and English and prepares structured quotation inputs; semi-automates a previously manual step.
- **Internal ERP for HVAC Operations** — Costing, BOM, quotations, inventory, and operational data in one internal system, used locally for daily operations (no public version).
- **Acoustic Path Analysis (AHRI 885)** — Acoustic path calculations and sound attenuator selection to meet project noise criteria.
- **Operational KPI Dashboards (Power BI)** — 6 dashboards covering service requests, work orders, quotations, workload, employee performance, and management reporting; replaced approximately 8 hours per week of manual Excel reporting.
- **HVAC Training Program** — Designed a 7-module HVAC training curriculum; mentored more than 15 junior engineers and data specialists.

EDUCATION

BSc Mechanical Engineering — Alexandria University, Egypt · 2021

LANGUAGES

Arabic (Native) · English (Full professional proficiency) · Italian (Limited working proficiency)
