PROFESSIONAL SUMMARY

Lean Six Sigma Black Belt and PMP® with 5 years in HVAC manufacturing, focused on turning engineering operations into data-driven, automated systems. Led an 18-member team of engineers and data specialists, redesigned service-request and work-order workflows with value stream mapping, Pareto, and root cause analysis, and built 6 Power BI dashboards that replaced approximately 8 hours per week of manual Excel reporting. Currently builds an internal ERP and an AI-assisted quotation workflow for daily HVAC operations.

CERTIFICATIONS

- **Project Management Professional (PMP®)** — Project Management Institute (PMI) · Credential No. 4252282 · Dec 2025 – Dec 2028
- **Certified Lean Six Sigma Black Belt** — IMC, CPD-accredited (72 CPD hours) · Certificate C-2026-061167 · Sep 2026

CORE SKILLS

- **Process Improvement:** Lean Six Sigma, DMAIC, value stream mapping, root cause analysis, Pareto analysis, KPI development, SOP and workflow design, continuous improvement
- **Operations & Project Management:** Project management (PMP®), project coordination, workforce and capacity planning, scheduling, risk and escalation management, team leadership, onboarding and training
- **Digital & Automation:** Power BI, Advanced Excel, ERP design, workflow automation, AI-assisted document processing, Microsoft Project, Microsoft 365
- **HVAC Engineering:** BOM and cost estimation, technical proposals, product selection, submittals; SMACNA, ASHRAE 70, AHRI 885, AMCA 500, UL 555/555S; AutoCAD, Revit, SolidWorks

PROFESSIONAL EXPERIENCE

Senior Technical Office & Estimation Engineer

AL SAMMAN for Air Distribution — Ductwork & Accessories Factory, Egypt | Apr 2026 – Present

- Designed and developed an internal HVAC ERP system (costing, BOM, quotations, inventory, operational data), used locally for daily operations — an internal system, not a commercial product.
- Built an AI-assisted document-processing workflow that converts BOQs (Excel, PDF, Word, scanned; Arabic and English) into quotation inputs, replacing a fully manual step with a semi-automated one.
- Prepare bills of materials (BOM) and cost estimates for HVAC air-distribution products as part of tendering and quotations.
- Coordinate technical submittals, prequalification packages, and compliance documentation for HVAC projects.

CSD Operations Team Leader

Rabie Al-Takyeef Factory — HVAC Manufacturing, Egypt · Customer Service Department (CSD) | Aug 2024 – Feb 2026

- Redesigned service-request and work-order workflows using value stream mapping, Pareto analysis, and root cause analysis.
- Built and deployed 6 Power BI dashboards (service requests, work orders, quotations, workload, employee performance, management reporting), replacing approximately 8 hours per week of manual Excel reporting.
- Led and mentored an 18-member cross-functional team of engineers and data specialists; the team handled approximately 9,500 customer service requests, 2,000 work orders, and 500 quotations per year.
- Acted as escalation point for operational and project risks; mitigated 3 major schedule overruns through early intervention and resource reallocation.
- Resolved more than 20 critical technical issues through cross-functional coordination and structured problem solving.
- Recruited and onboarded 10 new team members; designed a 7-module HVAC training curriculum and mentored more than 15 junior engineers and data specialists.

Technical Support Engineer

Rabie Al-Takyeef Factory — HVAC Manufacturing, Egypt | Dec 2021 – Jul 2024

- Prepared technical offers, quotations, submittals, and prequalification documents for more than 200 proposals across Egypt and the GCC.

- Supported product selection for air outlets, grilles, volume control dampers (VCDs), fire and smoke dampers, VAV boxes, louvers, ductwork, and sound attenuators.
- Aligned technical documentation with SMACNA, ASHRAE 70, AHRI, AMCA 500, UL 555, and UL 555S requirements.

SELECTED PROJECTS

- **Service-Request & Work-Order Workflow Redesign** — Value stream mapping, Pareto analysis, and root cause analysis applied to the service-request and work-order process.
- **Operational KPI Dashboards (Power BI)** — 6 dashboards covering service requests, work orders, quotations, workload, employee performance, and management reporting; replaced approximately 8 hours per week of manual Excel reporting.
- **Internal ERP for HVAC Operations** — Costing, BOM, quotations, inventory, and operational data in one internal system, used locally for daily operations (no public version).
- **AI-Assisted BOQ-to-Quotation Workflow** — Reads Excel, PDF, Word, and scanned BOQs in Arabic and English and prepares structured quotation inputs; semi-automates a previously manual step.
- **HVAC Training Program** — Designed a 7-module HVAC training curriculum; mentored more than 15 junior engineers and data specialists.

EDUCATION

BSc Mechanical Engineering — Alexandria University, Egypt · 2021

LANGUAGES

Arabic (Native) · English (Full professional proficiency) · Italian (Limited working proficiency)
